

# QuickBooks Online Integration

## Let PPS help eliminate manual data entry with the QuickBooks Online Integration

Premier now offers an integration with isolved and QuickBooks Online that allows the payroll journal entry to be automatically imported with each payroll run. The automatic entry of the payroll journal entry eliminates the need for manual data entry into QuickBooks Online.

### How does it work?

- 1 Premier will map your payroll journal entry.
- 2 Premier will link your isolved account to your QuickBooks Online account
- 3 Once your payroll is processed, the payroll journal entry would be automatically uploaded to your QuickBooks Online Account

### Features of the Integration:

Sync QuickBooks Online journal entries upon payroll processing

No more errors with manual data entry

Seamless integration

Save time with automation

### How do I get started?

Before we set up the integration, clients must confirm that they are the administrator of an active QuickBooks Online account and know their user name and password. Clients must also provide PPS with a sample journal entry and a copy of their chart of accounts.

Premier Payroll will work with our clients to assist with journal entry setup in isolved.
